

Working towards an improved public transport network

Have your say

Right now the Tasmanian Government is looking at public bus services across Tasmania and would like to know what is working well and what could work better.

- Could the route be improved?
- Need evening or weekend services?
- Wish you could change the time it runs?
- Have ideas on how your bus service could be improved?
- Or, maybe the current service works well for you and you would like it to stay that way.
